📍 Kakkanad, Cochin

- Leading software development projects and teams.
- Designing, developing, and maintaining software systems.
- Collaborating with project managers, designers, and other stakeholders to establish project requirements and specifications.
- Effectively communicating with team members and other stakeholders.

## PROJECTS

### Real Estate - Web Application

Developed a user-friendly online marketplace for property buyers and renters using .NET Core and React.js. The platform offers seamless property listings, search functionality, and modern UI for enhanced user engagement.

### Doctor Appointment Booking System - Web Application

Developed a full-stack web app using Node.js and React.js to streamline appointment scheduling. Users can browse doctors by specialty, view availability, and book slots in real time. Includes responsive UI and efficient data handling for a smooth user experience.

### Marketplace - Web Application

Built an e-commerce platform using .NET Core and React.js, replicating core functionalities of Flipkart. Enables users to buy and sell products, with integrated agent support for order delivery and fulfillment.
